

Project Factsheet #7

Component 4 - Technical Assistance

The TRHDP will consist of 4 components: (i) Hydropower Facility (HPF); (ii) Access Road; (iii) Transmission Line; (iv) Technical Assistance (TA).

Component 4 - Technical Assistance (TA) - US \$10 million.

The total cost for the Technical Assistance (TA) is estimated at US \$10 million. This component supports the operation of the Project Office under MMERE to finance consultants to oversee the project and deliverables of the components.

Component 4 will be implemented by Ministry of Mines, Energy & Rural Electrification (MMERE), through the Project Office, who will recruit key Project Office staff including:

- Environmental, Social and Gender Focal Point Experts
- maintain the Dam Safety Advisory Panel member
- recruit an independent Environmental and Social Monitoring Agent
- external auditors and specialized technical experts when required.

The following actions are required of the PO to deliver on the technical assistance support for project implementation:

- prepare and periodically update the Project Operations Manual in cooperation with the other implementing entities
- provide awareness building and training
- monitor and support environmental and social safeguard arrangements and the Gender Action Plan (GAP)
- implement the Land Acquisition and Livelihood Restoration Plan (LALRP) for components 1 & 2
- maintain a Dam Safety Advisory Panel (DSAP) and independent environmental and social monitoring agent
- oversee and advise on disbursement requests under components 1 & 2
- conduct a cumulative impact assessment
- liaise with various government counterparts and other stakeholders
- support implementation agreements agreed under the land acquisition process
- support communities in utilizing their share of project benefits for community development
- to report to the World Bank and other financiers on project performance and achievement of objectives.
