

Engineering Manager:

We, Hyundai Engineering Company, the Engineering Procurement and Construction Contractor for Tina River Hydropower Development Project (3X5MW) are looking for Engineering Manager for our project.

Engineering Manager have experience of two hydro power plants or be engaged to be over 6 years for the hydropower projects as the general civil designer. Responsible for overseeing a design variation for each process with settling down the issues (including the mechanic and electric interface and procurement, installation) from the Employer's Representative and presenting the main design issue to the Employer.

Qualifications:

- Bachelor degree of civil or higher grade in Hydrology discipline based on the civil discipline.
- Design for 6 years or longer experiences for hydro power projects.
- Design for 4 years or longer experiences for other civil projects.
- Should have executed at least two, medium to large size projects, engaged in the the design overview part with at least a total experience of 10 years.
- Hydropower project in overseas.
- Ability to build professional skills, and set and monitor tasks and sub-projects.
- Strong interpersonal and communication skills including in a culturally diverse or multi-disciplinary environment.
- Ability to manage a complex project, work to deadlines and establish procedures for monitoring and reporting.

Responsibilities:

- General design overview for the civil and electric/mechanic, finding the interface matter and suggesting a remedy.
- Participation in every meeting to respond the design issues to the Employers.
- Report work relative to the discharge and sediment monitoring as well as

TINA RIVER HYDROPOWER DEVELOPMENT PROJECT, Grass Hill Area, Malango Ward, Guadalcanal Province, Solomon Islands, Tel: TEL: 677-747-3122

plotting curve, Operation and management etc.

- Document management such as drawing, calculation and specification etc.
- Discharge and sediment monitoring work at the river channel with local staff.
- Design register management that has been continued with the Employer's Representative, off taker and DSAP.
- Close coordination with construction team, providing the varied design to them without skipping the design results and discussing the field matter with this team.
- Coordinate for the design interfaces with Civil/Architecture /Electromechanical / Electrical Project Engineers and other discipline leads.
- Coordinate with Employer's Representative and in case of happening some issues, visiting and discussing it prior to sending to official letter.
- Checking the quality test results and demanding the field test to the QA & QC team.
- Upholding the Project HSE (Health, Safety, and Environment) management system to prioritize safety.
